#### Daily Attendance Record and Monthly Summaries

#### Directions

- 1. In the Daily Attendance Record, page 14, write in alphabetical order first the names of the boys and then the names of the girls, giving in each case the surname first.
- 2. Give under Age the age each child was on September 1, and do not change the age during the session.
- 3. On the last school day of the month fill in all the items called for in the summary for the first month shown on this page, and mail the monthly report to the super-intendent's office or clerk of the school board, as directed. Do the same for each of the succeeding months.
- 4. Average daily attendance for any month is found by computing the total number of days pupils were present that month and dividing this number by the number of days school was open that month; for example, if 25 pupils were present a total of 455.5 days in any month, and the school was open 20 days that month, the average daily attendance is 455.5 divided by 20 which equals 22.7 or 23.

Average daily attendance for the term or year is found by computing the total number of days pupils were present during the year and dividing this number by the total number of days school was open during the term. (Average daily attendance for the term cannot be found by adding the daily attendance for all months taught and dividing by the number of months school was open, except when each school month has exactly the same number of days taught)

DIRECTIONS.—After the number of pupils (boys and girls entered in separate columns) is filled in properly in the first vertical column for the first grade and then for the other grades, the number of girls under seven years of age should be totaled. By "Total—A;" then the number of boys under seven years of age for all the grades as recorded should appear in the proper space in the first column under "Total—D," and in like manner the number of girls under seven years of age should be totaled. By the same method the number of boys and then the number of girls of the other ages represented should be totaled in the appropriate spaces under "Total—D," merely represents the sum total of boys and girls recorded under "Total—D." Total—A; and the total of all of the items opposite "Total—A," and the total of all of the items opposite "Total—A," and the total of all of the items opposite "Total—A," and the total of all of the items opposite "Total—B" should be the same. Likewise the total of boys and girls under "Total—D" should equal the total under "Grand Total—B." This is an easy method of checking the data required in this table.

A further check should be made of the Age-Grade Distribution against the table appearing under Summaries for Term shown elsewhere in this register; for example, the totals, boys and girls, for grades 1, 2, 3 and 4 in the Age-Grade Distribution should be the same as the total of item 13 in Summaries for Term. Totals, boys and girls, for grades 8 and 9 be the same as the total of item 13 in Summaries for Term.

Total—O" should be the same as the total of item 17 in Summaries for Term.

"Total—G" above calls for the total summaries for Term.

"Total—G" above calls for the total summaries for Term.

"Total—G" above calls for the total number of pupils, boys and girls, promoted, failed, and dropped for each grade. These totals when summarized should check with the summaries of these items under Summaries for Term.

Total—O" above calls for the total number of pupils, boys and girls, promoted, f

DIRECTIONS.—After the number of pupils is filled in properly in the first vertical column for the first grade and then for the other grades, the number in each grade is to be totaled as provided opposite "Total-A;" then the number of children under seven years of age for all grades as recorded should appear under "Total-B" in the proper space; in similar manner the number of children of other ages should be totaled in the appropriate spaces under "Total-B". The total of all the items opposite "Total-A" and the total of all the items under "Total-B" placed at the bottom of the column headed "Total-B" should be the same. This is an easy method of checking the data required in the table.

A further check should be made of the Ara-Grade Distribution against the table.

A further check should be made of the Age-Grade Distribution against the table appearing under Summaries for Term, shown on the opposite side of this sheet; for example, the

totals for grades 1, 2, 3 and 4 in the Age-Grade Distribution should be the same as the total of item 9 in Summaries for Term. Again totals for grades 5, 6 and 7 in the Age-Grade Distribution should be the same as the total for item 13 under Summaries for Term. Totals for grades 8 and 9 in the Age-Grade Distribution should be the same as item 17 under Summaries for Term and the totals of grades 10 and 11 under Age-Grade Distribution should be the same as rem 21 under Summaries for Term.

"Total-C" above calls for the total number of pupils promoted, failed, and dropped for each grade; these totals when summarised should check with the summaries of these, items under Summaries for Term.

### TERM REPORT—Elementary and High Schools

Teacher Miss	Lalma	Campbell	/ Race	White	School Veer	1929-	1931
1 cacher	(Mr., Mrs., or Miss)		1000		School Tear_	1100	11-0

DIRECTIONS.—With ink write below in alphabetical order first the names of boys, and then the names of girls, giving in each case the surname first. Give in column two, age on September 1st. See the register for method of computing average attendance and percentage of attendance. Under school subjects below, write a fraction in proper space after each name, the numerator to show the grade the pupil is in for current session and the denominator the grade to which promoted; modify subject titles for high school use.

DIRECTIONS.—After the number of pupils is filled in properly in the first vertical column for the first grade and then for the other grades, the number in each grade is to be totaled as provided opposite "Total-A;" then the number of children under seven years of age for all grades as recorded should appear under "Total-B" in the proper space; in similar manner the number of children of other ages should be totaled in the appropriate spaces under "Total-B". The total of all the items opposite "Total-A" and the total of all the items under "Total-B" placed at the bottom of the column headed "Total-B" should be the same. This is an easy method of checking the data required in the table.

A further check should be made of the Age-Grade Distribution against the table appearing under Summaries for Term, shown on the opposite side of this sheet; for example, the

of item 9 in Summaries for Term. Again totals for grades 5, 6 and 7 in the Age-Grade Dis-tribution should be the same as the total for item 13 under Summaries for Term. Totals for grades 8 and 9 in the Age-Grade Distribution should be the same as item 17 under Summaries for Term and the totals of grades 10 and 11 under Age-Grade Distribution should be the same as item 21 under Summaries for Term.

"Total-C" above calls for the total number of pupils promoted, failed, and dropped for each grade; these totals when summarized should check with the summaries of these, items under Summaries for Term.

# DIVISION SUPERINTEDENT OF SCHOOLS FOR BEDFORD COUNTY Becford, Virginia

SPECIAL REPORT TO SUFERINTE DENT (to be returned with term reports)

School Year 1929-1930

1.	SCHO	OL PROPERTY
